Benefits of IP Telephony

VOYSIS
IP SOLUTIONS

Choosing IP Telephony for in-house Communications

Businesses can benefit from what IP telephony, or VoIP, has to offer. Among its most significant advantages are recovery solutions that guarantee security and increase the quality of customer service and employee collaboration. An increasing number of companies are choosing IP telephony for their in-house communications because of the reliability and flexibility.

What Voysis has to Offer

Voysis IP Solutions offers intuitive, modern, and reliable telephony systems. For example, our systems provide easy and intuitive access to multi-function telephony and numerous advanced applications.
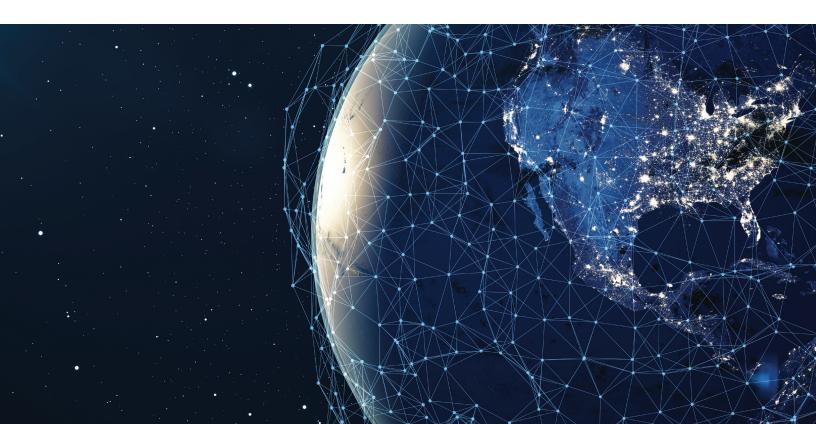

We can also provide IP telephony solutions tailored to your needs with a high level of sophistication and provide Mitel IP phones, which are easy to configure and use. These telephony systems come with a number of practical and advanced features that will foster employee communication, improve the way you communicate with your clients and suppliers, and increase productivity.

Voysis is committed to offering customized IP telephony solutions reflecting your business needs, with flexible configuration possibilities that provide great freedom, choice, and peace of mind.

VoysisCloud and Why You Need to Migrate Now

I can sit here and give you a million reasons why you would need to migrate to any cloud server so I will not do that however I will give you reasons why VoysisCloud solutions rank among the most reliable and advanced on the market, and why you should begin thinking about, and eventually, migrating to the VoysisCloud.

Without getting into too much detail, VoysisCloud will help reduce in-house infrastructure costs (there are zero up-front costs)—our VoysisCloud solution allows you to use the same phones you are already running and devices that support SIP. In other words, our VoysisCloud solution is tailored to B.Y.O.D (or bring your own device) which allows for a significant cost savings since there is no need to keep additional on premise material or a full-time technical staff. Our cloud telephony systems connect to a secure data center dedicated to your company's own infrastructure, and get this—at a fix cost.

How Does the VoysisCloud System Work?

Answer: Simplicity at its finest. At Voysis, we believe in finding simple solutions to your everyday telephony needs. That is why the data from your telephony system is stored in a secured center. The cloud can support a wide range of security features—your VoysisCloud platform is a multi-instances and dedicated server hosted in our Tier 3 Data center, which you can easily connect to via the internet. Our system is flexible, allows you to add users, and improves customer service, employee responsiveness, and business on the go.

At Voysis IP Solutions, we aim to apply our "simplicity" methodology to telephony systems and networks. By doing so, we streamline the communication process by being an important contributor to our clients' success. Our broad choice of solutions are tailored to our client's requirements from basic packages to a more sophisticated unified communication system always including numerous strategies for ensuring privacy of your communications.

About Us

Incorporated in 2003, Voysis IP Solutions is a Mitel authorized reseller. Voysis IP Solutions supports the entire Mitel product portfolio and with our engineers, we create great solutions based on our customers' needs. Voysis IP Solutions supports both hosted and enterprise solutions.

We recognize that the value of a communications solution is different for every business. Our portfolio of solutions are highly scalable, secure, easily managed, and optimized to meet the evolving communications needs of our customers.
