

PROVEN PROCESS

Kick-Off Relationship Meeting

Our Account Executive will educate you on Voysis, our team, and gain a complete understanding of your company culture, expectations, and goals, all while educating you on how Voysis can be a strategic partner for you with our portfolio of services/solutions.

Proposal and Demo

Voysis will define the necessary steps as well as outline how we will deliver our solution/service in a detailed preliminary proposal and present our solution (demo) at our Voysis offices.

Final Review

Voysis will customize a solution based on customer and business needs, with flexible configuration possibilities that provide great freedom, choice, and peace of mind. Our team of telecom specialists will give you the advice needed to help you find the right solution for your company's needs.

Network Assessment

Voysis will support Customer's IT team to ensure the current network supports SimplyVoysis voice prerequisite. Customer will sign off SimplyVoysis Network File name and will need to send results of the validation tools received from Voysis. The network assessment will need to be completed prior to starting the projects.

Project Implementation

Voysis will begin to implement your customized solution through our operations department and through a project kickoff, we will introduce our team; launch our project plan and priorities.

Proactive Service

Voysis provides the necessary training and developmental programs to enhance the skills, knowledge, and learning ability in order to make our client's project a success. Our Technical Account Manager will be in constant contact with your team, providing updates, coordinating meetings, and being the contact person for project matters.
